Western Canadian Grass Seed Testing Program

2000 Report

Saskatchewan

Manitoba

INTRODUCTION

This report provides a summary of the grass seed trials conducted under the Western Grass Testing Program during 2000. The main objective of these trials is to determine the seed production potential and adaptability of grass varieties for contract seed production for the domestic and export market. All attempts have been made to ensure the success of these trials, however, at times environmental conditions may adversely affect the yield results regardless of the management practices followed.

We thank the following companies for their sponsorship of our research endeavours and look forward to cooperating and working with them during the 2001 production year.

Advanta Seeds Pacific, Inc.
Alberta Research Council
Brett-Young Seeds Ltd.
Cascade International Seed Co.
Cebeco International Seeds, Inc.
Dawson Seed Company Ltd.
Deutsche Saatveredelung
Lesco, Inc.
Montana Turfgrass Technologies
Newfield Seeds
Northstar Seed Ltd.
Parsons Seeds
Peace Valley Seeds
Pickseed
Proven Seed
Scott's Company
Turf-Seed, Inc.

Data Collection Procedures

Seed Yield	reported on a clean seed basis in kg ha ⁻¹ (kg ha ⁻¹ x 0.9 = lbs ac ⁻¹)
Harvest Date	date the variety was swathed.
Plant Height	measured in centimetres and is the height of the plant at harvest from ground level to the tip of the seed head (1 cm x 0.3937 = inches).

Trial Procedures

For information on specific trial procedures, contact the respective location representative listed on the following page.

*** Please Note ***

Some varieties in this report have been tested for shorter periods of time than others. It is advised not to use average yield figures to make variety comparisons for single-year data. Only after a **minimum** of three years of testing should data be considered as 90% reliable. In some cases, data may not be reported due to extreme variations that cannot be accounted for in the statistical design.

Statistical information for this report was generated through an Analysis of Variation (ANOVA) . Least significant difference (LSD) values are presented at the bottom of each table when statistically significant differences are present using the 5% level of significance. This means there is a 95% probability that you can reject the hypothesis that the treatments are the same or there is only a 5% probability that the treatment differences occurred by chance. If the difference in treatment values is less than the LSD value, the treatments are not considered to be significantly different.

Protocol for Western Grass Seed Testing (WGST) Program

1. Research Sponsorship Charge

The research sponsorship charge will be \$110CAN/entry/year/location and is requested on an annual basis as years of production will vary with the species being tested. The charge is applied for the establishment year. Funds will be administered by Alberta Agriculture, Food and Rural Development for the Western Grass Seed Testing Program.

2. Eligibility of Entries

Released and experimental lines of all tame grass species will be considered if they are of interest to commercial seed companies. We reserve the right to **NOT** initiate tests:

- if seed arrives late
- if there is lack of space in any year at a particular location
- if there are too few entries in any year for a particular location

3. Seed Requirements and Deadline for Seed Entry

The applicant will provide for **EACH TEST LOCATION**:

- 50 gm of bentgrass, Kentucky bluegrass or timothy
- 100 gm of creeping red, chewings, hard, meadow, sheep and tall fescue, annual or perennial ryegrass or orchard grass
- 200 gm of meadow or smooth bromegrass

Submitted seed shall be supplied by **March 1** of the establishment year and will include the percent germination and relative maturity (early, medium or late) of each variety.

Please indicate whether the submission is a forage or turf type. Also, in the case of fescues please indicate whether the submission is a creeping, chewings, hard, meadow, sheep or tall fescue.

4. Use of Seed

Seed submitted will only be used to establish the agreed upon trials. The seed will **NOT** be used for increase, selection or distribution

5. Test Locations (see map page 3)

1. Fort St. John, British Columbia
2. Beaverlodge, Alberta
3. Brooks, Alberta (irrigated)
4. Bow Island, Alberta (irrigated)
5. Vegreville, Alberta
6. Melfort, Saskatchewan
7. Outlook, Saskatchewan (irrigated)
8. Portage La Prairie, Manitoba (irrigated)
9. Arborg, Manitoba

The applicant selects the locations where they wish their material to be tested.

6. Test Description

Due to plot equipment differences and land availability at the various test sites, certain minimums will be met in establishing trials. Each test will be a randomized complete block consisting of a minimum of 4 replicates. No test will have more than 25 entries of a particular species. Plots will be seeded at appropriate seeding rates for the species being tested and normal cultural practices for the area will be carried out. A minimum of 3 sq. m is to be harvested.

Species, check varieties and years of testing (establishment year and seed production years):

Bentgrasses - 18th Green - 4 yrs.	Tall Fescue - Courtenay - 4 yrs
Kentucky Bluegrass - Abbey - 4 yrs	Orchard Grass - Kay - 3 yrs
Meadow Bromegrass - Fleet - 4 yrs	Annual Ryegrass - Aubade - 1 yr
Smooth Bromegrass - Carlton - 4 yrs	Perennial Ryegrass - Norlea - 2 yr
Meadow Fescue - Mimer - 4 yrs	Timothy - Climax - 4 yrs
Red Fescue - Boreal - 3 yrs	

Information to be recorded will include pure seed yield, % stand in fall and spring, plant height, harvest date and if available, climatic data for each test site.

7. Publication of Results

Data will undergo appropriate statistical analyses and each applicant will be provided with an annual report. Information on varieties will be made available in various annual reports and upon request to seed producers.

- 8.** All reasonable care will be taken to ensure a successful test, however, a guarantee can not be made that a particular test will be successful.
- 9.** For further information, contact:
